How to Join My Video Visit – Epic MyChart

Patients and their proxies can access video visits with providers by utilizing Epic MyChart. Video visits are schedule by the provider office and can be accessed by using the MyChart App or Web Portal.

- 1. Log into MyChart to view upcoming appointments.
 - a. If you are a proxy for a patient, log in as yourself and click **Switch** to select the patient's name (top right) that has the video visit.

- 2. Select **Visits**, and review the appointment date and time; click on **Details** when you are ready to join the visit.
 - a. Video visits can only be joined 30 minutes before the scheduled time; however, providers will join the video visit at the scheduled time.

3. Select Begin Video Visit to initiate the visit:

4. Select **Continue in Browser**, and click **Check In** to join the video visit.

5. Select Allow for the website to use the microphone, and camera on your device, and select proceed when prompted.

- 5. Select **Check In**, so the provider will know that the visit is ready to be joined.
 - a. Allow the site access to your Microphone and Camera; select **Proceed** after your Audio and Video connections are tested, and wait for the provider to join.

- 6. The video visit will begin once the MD arrives; do not leave until after the visit takes place.
 - a. Plug in a mic and headphones if you will be using them.
 - b. Provider will end the visit once the visit is completed.

If you have any issues joining your telemedicine visit, use the attached steps to troubleshoot the issue. Call your clinic if you need further assistance.

Please know that you must end the call with the clinic before selecting Begin Visit if you are joining the video visit on the same device the call is active on.

How to Change My Default Browser – Android:

Download Chrome if it is not already installed.

1. Open Settings, and search for Default Apps, or scroll through settings and select Apps:

2. Select Default Apps if you searched, or select the 3 dots and select Default apps after Apps opens:

	< Default Apps	×		Apps
[Apps Default apps		< All (231) ▼	Q II Sort by Default apps
l	General management > Rese	et		Permission manager
	Factory data reset Reset your phone to its factor erase all data, including files			Show system apps Special access
				Reset app preferences

3. Click on Browser App, and Select Chrome or Firefox (whichever you downloaded):

4. Chrome will populate as the default app, and the Video Visit can now be started.
